-Promethazine Hydrochloride and Codeine Phosphate Syrup can cause serious side effects including death.
- Take Promethazine Hydrochloride and Codeine Phosphate Syrup exactly as prescribed by your healthcare provider. If you take the wrong dose of Promethazine Hydrochloride and Codeine Phosphate Syrup, you could overdose and die.
- It is especially important when you take Promethazine Hydrochloride and Codeine Phosphate Syrup that you know exactly what dose to take.

### What is Promethazine Hydrochloride and Codeine Phosphate Syrup?
- Promethazine Hydrochloride and Codeine Phosphate Syrup is a prescription medicine used to temporarily treat cough and upper respiratory symptoms that you can have with allergies or a common cold. Promethazine Hydrochloride and Codeine Phosphate Syrup contains 2 medicines, promethazine and codeine. Promethazine is an antihistamine. Codeine is a narcotic cough suppressant.
- **Promethazine Hydrochloride and Codeine Phosphate Syrup is a federal controlled substance (C-V) because it contains codeine that can be abused or lead to dependence.** Keep Promethazine Hydrochloride and Codeine Phosphate Syrup in a safe place to prevent misuse and abuse. Selling or giving away Promethazine Hydrochloride and Codeine Phosphate Syrup may harm others, and is against the law. Tell your healthcare provider if you have ever abused or been dependent on alcohol, prescription medicines or street drugs.
- Promethazine Hydrochloride and Codeine Phosphate Syrup is not for children under 6 years of age.

### Who should not take Promethazine Hydrochloride and Codeine Phosphate Syrup?
- **Do not** give Promethazine Hydrochloride and Codeine Phosphate Syrup to children who are under 6 years of age.
- **Do not** give Promethazine Hydrochloride and Codeine Phosphate Syrup to a child to treat pain after tonsillectomy or adenoectomy surgery.
- **Do not** take Promethazine Hydrochloride and Codeine Phosphate Syrup if you are allergic to any of the ingredients in Promethazine Hydrochloride and Codeine Phosphate Syrup. See the end of this Medication Guide for a complete list of ingredients in Promethazine Hydrochloride and Codeine Phosphate Syrup.
- **Do not** take Promethazine Hydrochloride and Codeine Phosphate Syrup if you have asthma.

### Before you take Promethazine Hydrochloride and Codeine Phosphate Syrup, tell your healthcare provider about all of your medical conditions, including if you:
- have a drug dependence
- have lung or breathing problems including chronic obstructive pulmonary disease (COPD), or sleep apnea
- have had a head injury
- have pain in your stomach-area (abdomen)
- have a history of severe or persistent cough
- have prostate problems
- have problems with your urinary tract (urethral stricture) or difficulty urinating
- have had surgery recently or plan to have surgery
- drink alcohol

- have glaucoma (increased pressure in eyes)
- have diabetes
- have seizures
- have heart problems
Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. Taking Promethazine Hydrochloride and Codeine Phosphate Syrup with certain other medicines can cause side effects or affect how well Promethazine Hydrochloride and Codeine Phosphate Syrup or the other medicines work. Do not start or stop other medicines without talking to your healthcare provider. Especially tell your healthcare provider if you:

- take pain medicines such as narcotics
- take cold or allergy medicines that contain antihistamines or cough suppressants
- take medicines for mental illness (anti-psychotics, anti-anxiety)
- drink alcohol
- take medicines for depression, including monoamine oxidase inhibitors (MAOIs)
- take medicines for stomach or intestinal problems

Ask your healthcare provider if you are not sure if you take one of these medicines.

**How should I take Promethazine Hydrochloride and Codeine Phosphate Syrup?**

- Take Promethazine Hydrochloride and Codeine Phosphate Syrup exactly as your healthcare provider tells you to take it.
- Your healthcare provider will tell you how much Promethazine Hydrochloride and Codeine Phosphate Syrup to take and when to take it. Do not change your dose without talking to your healthcare provider.
- Ask your pharmacist to give you a measuring device to help you measure the correct amount of Promethazine Hydrochloride and Codeine Phosphate Syrup. Do not use a household teaspoon to measure your medicine. You may accidently take too much.
- **Do not** take more than 30 mL of Promethazine Hydrochloride and Codeine Phosphate Syrup in 24 hours.
- If you take too much Promethazine Hydrochloride and Codeine Phosphate Syrup, call your healthcare provider or go to the nearest hospital emergency room right away.

**What should I avoid while taking Promethazine Hydrochloride and Codeine Phosphate Syrup?**

- Promethazine Hydrochloride and Codeine Phosphate Syrup can cause you to be drowsy. Avoid driving a car or operating machinery during treatment with Promethazine Hydrochloride and Codeine Phosphate Syrup. Also, watch your child closely when riding a bike.
- Avoid drinking alcohol during treatment with Promethazine Hydrochloride and Codeine Phosphate Syrup. Drinking alcohol can increase your chances of having serious side effects.
- Avoid spending a long time in sunlight.

**What are the possible side effects of Promethazine Hydrochloride and Codeine Phosphate Syrup?**

Promethazine Hydrochloride and Codeine Phosphate Syrup may cause serious side effects, including:

- See “What is the most important information I should know about Promethazine Hydrochloride and Codeine Phosphate Syrup?”
• **Breathing problems (respiratory depression)** which can lead to death. Call your healthcare provider or get emergency treatment right away if you have excessive sleepiness, shallow or slow breathing, or confusion.

• **Physical dependence or abuse.** Take Promethazine Hydrochloride and Codeine Phosphate Syrup exactly as your healthcare provider tells you to take it. Stopping Promethazine Hydrochloride and Codeine Phosphate Syrup suddenly could cause withdrawal symptoms.
